

## OBJECT OF THE GAME

Come on down and race to win luxurious prizes by playing one of the Price is Right's most popular games of chance - Plinko!

On each turn, players will press their luck to earn Plinko chips in a game of Plinko Hi-Lo! Then, when players earn Plinko chips, drop them into the top of the Plinko board to see what they will collect among a range of Price Is Right prizes worth up to \$5,000 each! Where will your chips land?

Compete with other contestants to see who will score the highest overall prize value at the end of the game to win!

## SET UP

- Assemble the Plinko board (see Assembly section)
- Place the Plinko board, Prize board, and Plinko chips on the table within easy reach of all the players.
- Shuffle the square Money cards and place them face-down on the table.
- Finally, shuffle the Prize cards and place a card face-up each of the seven spaces on the game board.
- The youngest player will take the first turn!

**CONTENTS:**  
1 PLINKO BOARD  
1 PRIZE GAMEBOARD  
7 PLINKO CHIPS  
35 LUXURY PRIZE CARDS  
100 MONEY CARDS

GRAPHIC DOES NOT SHOW BEGINNING OF PLAY SETUP. THE GAME STARTS WITH NO CHIPS ON THE PLINKO BOARD.

## HOW TO PLAY

Players take turns throughout the game. Each turn begins with a game of Plinko Hi-Lo in order to win money cards. Earn enough Money cards to purchase Plinko Chips. When a player buys Plinko chips they may drop them into the Plinko board to win Price is Right Prize cards.

### ON YOUR TURN:

#### 1 PLAY PLINKO HI-LO TO EARN PLINKO CHIPS

Flip over the top Money card in the deck and place it face-up on the table. Then make a prediction for the next card - will it be HIGHER or LOWER in value than the Money card you just drew? Flip over the next card and place it on top of the previous card to see if you were correct.

**IF YOU ARE CORRECT - you have two choices:**

- Stop predicting and collect all the face-up Money cards from your turn and add them to your score pile. If you have earned enough Money cards, then you may purchase a Plinko chip.
- Push your luck and attempt to win more Money cards by making another prediction. Will it be HIGHER or LOWER than the card you just predicted correctly?

**OR**

Then, flip over the next Money card and placed on top of the previous card to reveal if you were correct or incorrect.

As long as a player is correct in their predictions, they may continue to make predictions, or STOP and collect all the cards in the pile and add them to their hand.

### MONEY CARDS

Money cards contain an image of the following denominations: \$1, \$5, \$10, \$20, \$50, \$100, and \$500.

**IF YOU ARE INCORRECT - you go BUST and immediately end your turn.**

Place all the money cards that you flipped over during the turn into the discard pile.

The next player begins their turn by flipping over the top Money card and making a prediction.

**NOTE:** If a flipped over card is the SAME as the last card, the player adds it to the pile and predicts what the NEXT card will be.

#### 2 SPEND MONEY CARDS TO BUY PLINKO CHIPS

When you have collected enough Money cards you may purchase a Plinko Chip for \$500. Purchase a Plinko chip by discarding a set of Money Cards that are equal in value to, or greater than \$500. Take one of the Plinko chips near the Plinko board and place it in front of you.

You may drop the Plinko chip right away or wait and drop on a later turn when new prize cards are available. However, you may only hold onto a maximum of one Plinko chip at a time.

#### 3 DROP PLINKO CHIPS TO WIN PRIZES

When you have acquired one or more Plinko Chips, you may drop them on your turn to win prize cards.

Hold the chip against the board above the slot you want to drop it in and let go. Watch the chip fall and bounce between pegs until it lands in a slot at the bottom of the board.

The Plinko Chip will land in a numbered slot at the bottom that corresponds with a numbered space on the gameboard. Take that Prize card and add it to your score pile. Draw a new Prize card and place it face-up on the empty space on the gameboard.

Remove the Plinko Chip from the bottom slot and place it next to the Plinko board for another player to purchase.

If you have another chip, you may drop again. After you finish dropping chips, your turn is over. Play then moves to the player on your left.

### PRIZE CARDS

These are what the players want to collect to win the game. Each card shows an image of the prize item along with its value.

### WINNING THE GAME

Once a player has collected 5 Prize Cards the remaining players take one last turn.

Then, each player adds up the values of the prize cards in their score pile. The player with the highest total value wins the game!

**NOW, YOU'RE READY TO PLAY!**
