

## GETTING STARTED:

- Each player chooses a pawn and places it on the corresponding colored **START** space on the board.
- Separate the 10 Answer cards from the rest of the Game cards.

- Each player receives 2 Answer cards (an A and a B card). Any extras go back in the game box.
- Place the Game cards in the card holder. Keep the Game cards and Reveal Wand close by.

- The game is played in a series of rounds. In each round a Game card is drawn, and a question is read out loud to the group by a reader. All players will answer on each question.
- Pick the first reader. On the count of 3, all players yell out a number. The player that said the second highest number will be the game's first reader.

## PLAYING THE GAME:

- To start each round, the current reader draws a card from the deck and reads the question on it to the group. There are 5 types of questions that will come up during the game (see **GAME CARDS**):

- **FACT & FICTION**
- **WHICH ONE IS...?**
- **WHAT'S YOUR NUMBER?**
- **BRAIN BLITZ!**
- **EYE WONDER**

- Now, all players – including the reader – may discuss, or debate the question on the card, but each player will be answering separately.

*\*Tip: Sometimes if you think you know the answer you may want to try and convince others to go for a different answer so you can be sneaky and score!*

- When all players are ready, it's time to share answers:

**If the question asks for a choice between A or B** – Players will use their A and B Answer cards to answer. When ready, all players place their card in front of them face-down. Then everyone reveals their card at the same time. These cards may have multiple winners.

**If the question is a What's Your Number? card** – Players will say their answers one at a time starting with the current reader. Then moving left, each player says their number out loud one at a time. Players may not repeat numbers. These cards only have 1 winner.

**If the question is a Brain Blitz or Eye Wonder card** – follow the directions on the card to play for the answer. These cards will only have 1 winner.

- After all answers have been announced the reader takes the Reveal Wand and places it over the Answer circle on the Game card to show the correct answer!

- Every player that answered correctly wins the question and moves their pawn forward one space!
- Every player that was incorrect does not move their pawn.
- The round is over, and a new round begins.
- The reader flips the card around, places it in the back of the card holder, and then passes the cards to the next player on the left. They are the next reader for the new round.
- Play continues until there is a winner (see **HOW TO WIN**).

## HOW TO WIN:

There can only be one winner in the weird, outrageous, and wacky world of Weird But True. The first player to reach the Winner's Circle is the winner!

### TIE-BREAKER

However, if more than one player reaches the finish at the same time, it is a tie, and the game is not over.

The game continues, and everyone still plays until there is one clear winner. A new round begins.

As soon as there is only ONE player in the Winner's Circle that correctly answered then the game is over, and they are the winner. If more than one player in the winner's circle answers correctly, or all players in the winner's circle answer incorrectly, it is still a tie and the game continues.

This allows other players to answer correctly, catch up, and join other players in the Winner's Circle to compete for the win.

## GAME CARDS

When playing there are 5 different types of question cards that will come up during play! All players will participate and play on every card! Here's how...

### FACT & FICTION

One is Fact. One is Fiction. Which one is the true fact? Use your A or B Answer card to answer. When ready, all players reveal their answer at the same time.

*These cards may have multiple winners.*

### WHICH ONE IS...?

It's a question of weird comparisons. Use your A or B Answer card to answer. When ready, all players reveal their answer at the same time.

*These cards may have multiple winners.*

### WHAT'S YOUR NUMBER?

This is a numbers game! So, every answer is a number. When ready, players take turns giving their answer one at a time starting with the reader. Players may not repeat numbers.

The closest number without going over the answer is the winner!

*These cards only have 1 winner.*

## GAME CARDS CONTINUED

### EYE WONDER

Everyone gets 1 guess to name what the image is a picture of. There are no turns when answering, just yell out your answer as soon as you think you know what it is. Players may not repeat answers.

Once everyone has made a guess, the reader reveals the answer. If a player answered correctly, they win!

*These cards only have 1 winner.*

### BRAIN BLITZ!

In this mini game, everyone will take turns naming one item from the topic below, starting with the reader and moving clockwise around the group. If you repeat an item already said, or fail to correctly name something in 5 seconds\*, you're out. The last player remaining wins!

Other players may count 5 Mississippi for the timer.

*These cards only have 1 winner.*

(\*Feel free to change the amount time)

AGES 8+  
2-5 PLAYERS

**What You'll Find Inside:**  
236 Questions (118 Cards),  
10 Answer Cards, 5 Pawns,  
Gameboard, Reveal Wand,  
Card Holder and Instructions

## OBJECT OF THE GAME:

Use your noggin and race to the finish by answering outrageous questions about strange animals, wild places, freaky phenomena and more while you deduce what exactly is... WEIRD, BUT TRUE! The first player to reach the Winner's Circle is the winner!

Everyone plays on every question. Each correct answer moves you one step closer to the Winner's Circle. Some questions allow multiple winners while others only allow one player to win.
